

Expense Tracker API Documentation

This document provides the complete API specification for the Expense Tracker backend. All routes are prefixed with `/api/v1` as configured in `server.js`.

Base URL

`http://localhost:5000/api/v1`

Authentication

Endpoints marked with **(Protected)** require a valid JWT token in the Authorization header:

```
Authorization: Bearer <your_token_here>
```

1. Auth APIs

Register a New User

POST `/auth/register`

Body Parameters (JSON)	Type	Required	Description
fullName	String	Yes	User's full name
